APart QUADPACK

MULTI CHANNEL AMPLIFIER

The Apart QUADPACK is a multi channel 100Volt amplifier of 4 x 150 Watts. I is very suited for use in big Public Address projects or matrix systems.

The QUADPACK consists of 4 modular monoblock amplifiers (Ref; Mb150) that are linked with 2 modular dual 100 Volts transformers (Ref; Dt150). All the coponents are mounted in a sturdy metal 19" frame. Each monoblock amplifier is equipped with a build-in limiter and an extended protection circuit.
The modular aspect contributes to the reliability and flexibility in your system design.

The QUADPACK comes with short AC linking cables so that only one power plug is needed.

TECHNICAL SPECIFICATIONS

Input	XLR Balanced 775mV, 20 kOhm
	RCA Cinch, 775 mV, 10 kOhm
Transformer output power:	150 watts per channel
Transformer power tappings:	50 - 70 - 100 voltsx
Frequency Response	25 Hz - 25 kHz
Low cut	100 Hz, 12 dB/oct
Power Supply	230V
Dimensions (H x W x D)	179 x 483 x 359 mm
Weight	25.65 Kg
